

Tesseract^{4.0}

WORKSHOPS

01

SCADA WORKSHOP

SCADA is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management. The uses of SCADA technology are vast. Because many industries require many monitoring and control capabilities that SCADA offers!!!

02

Leadership Exploration and Development Workshop

Knowing your talents and skills and honing them to bring out the best wherever you go defines a human and his ability to grow. To be able to lead and manage people requires expertise and Competence which will be shared with you at TESSERACT 4.0.

03

Blockchain Workshop

Been hearing about Blockchain for a long time? Wanna know more? How it works? How it goes? Curious enough?!! Now the wait is over, block chain is no longer a word none of us are unfamiliar with

04

Electric Vehicle Workshop

From the discovery of wheels to the present modes of conveyance, automobiles have come a long way and they never fail to mesmerize us. And in this list of variants lies the very own electric vehicle that is now paving way to a green and sustainable future.

TALKS

REG FEES

IEEE MEMBER

1000₹

Non-IEEE MEMBER

1200₹

Tesseract 4.0 is a two day IEEE event that includes several fun events as well as motivating talks and workshops. You're sure to take back a heart full of memories and a time worth your knowledge improvement.

The students will be provided accommodation and this would be a platform for constructive networking by which the students can share ideas and improve their technical skills. The connections that you make over here are sure to take you a long way in the future.

What makes a person different from the normal students is what they possess more than the others. The technical skills that you gain from Tesseract 4.0 is sure to make you unique and stand at the top of the crowd.
